COATS & CLARK™ ALL PURPOSE THREADS

SNAP TRAP

Coats & Clark's innovative Snap Trap Spool makes organization a breeze. Simply 'unsnap' the trap at either end of the spool to open and wind the thread around the core; 'snap' the trap to the closed position when finished. The thread end is held neatly and securely until the next use.

CARE DESCRIPTIONS

-  95°C boil wash. Articles e.g. in cotton or linen, white, suitable for boiling, dyed or printed. Fill the drum completely. Set an appropriate washing program (normal washing cycle). Pretreat stubborn stains.
-  60°C coloured wash. Coloured articles which must not be washed at boiling temperature e.g. made of cotton, modal, polyester and mixed fabrics.
-  Any bleach allowed.
-  Only oxygen bleach allowed.
-  Do not bleach. Use only bleach-free detergent.
-  Normal drying processes. Drying in the tumble dryer is possible under normal load without limitations.
-  Mild drying processes. Caution is appropriate when tumble drying. Select mild process with reduced thermal action (temperature, duration of treatment).
-  Hot Iron. Iron at maximum sole plate temperature of 200 °C. Corresponding to the "Cotton/linen" setting; iron whilst damp; treat and if necessary moisten; shiny or pressure-sensitive pieces should be ironed with press cloth or ironed inside out. A steam iron may be used.

 Iron at moderate temperature. Iron at maximum sole plate temperature of 150 °C. Corresponding to the "wool/silk/polyester/viscose" setting; iron under a moderately moist intermediate cloth. A steam iron can be used. Avoid heavy pressure.

 Iron at low temperature. Iron at maximum sole plate temperature of 110 °C. Corresponding to the "Polyacryl, polyamide (nylon), acetate" setting; if necessary, shiny or pressure-sensitive pieces should be ironed with a press cloth or inside out. Caution when using steam irons (as a rule, work without steam).

 Professional dry-cleaning in: perchloroethylene, hydrocarbons (heavy benzines). Normal cleaning process with no restrictions. Commercial stain removers on a solvent base may be used with some restrictions. A trial on a concealed part of the article is advisable beforehand.

 Professional dry-cleaning in: perchloroethylene, hydrocarbons (heavy benzines). Mild cleaning process with stringent limitation of added humidity and/or mechanical action and/or temperature. Commercial stain removers on a solvent base may be used with some restrictions. A trial on a concealed part of the article is advisable beforehand.

COIL

MOLDED

STAMPED

This chart outlines the different types of zippers available. For your convenience, article numbers are included.

COIL

The coil is made of 100% polyester using high technology computer-assisted coiling machines. The coil is either stitched onto the tape or woven into the tape. Quality coil zippers today are extremely split resistant and do not accidentally pull open.

MOLDED

Molded zippers have polyester teeth that are actually formed from polyester pellets that are melted and molded right on the zipper tape.

STAMPED

The stamped zipper has metal teeth that are clamped onto the zipper tape. The size of the teeth varies depending on the purpose of the zipper.
